LinkedIn: linkedin.com/in/andreigeorgescu

Summary

Data Scientist with a strong focus on Natural Language Processing and deep learning. Experienced in building, fine-tuning, and deploying transformer-based models for real-world applications. Passionate about extracting insights from text data and delivering scalable ML solutions.

Education

Master's Degree in Artificial Intelligence

Technical University of Cluj-Napoca

2022 – 2024

Bachelor's Degree in Computer Science

Technical University of Cluj-Napoca

2019 – 2022

Technical Skills

Programming: Python (advanced)

Machine Learning: scikit-learn, PyTorch, TensorFlow

NLP: Hugging Face Transformers, spaCy, NLTK

Data Processing: Pandas, NumPy

Big Data: Apache Spark (basic), Hadoop (basic)

Databases: SQL (PostgreSQL), NoSQL (MongoDB)

MLOps: Docker, MLflow (basic), CI/CD pipelines

Cloud: AWS (S3, EC2, SageMaker)

Projects

NLP Document Classification System

Built a text classification pipeline using BERT

Fine-tuned transformer models on custom datasets

Achieved 92% accuracy on multi-class classification task

Deployed model as a REST API using FastAPI

Named Entity Recognition (NER) System

Developed NER model using spaCy and Hugging Face

Processed large-scale text datasets (millions of documents)

Optimized model performance and reduced inference latency

Text Summarization Tool

Implemented abstractive summarization using transformer models

Evaluated performance using ROUGE metrics

Integrated tool into a web-based interface

Experience

Data Scientist

AI Solutions Lab

2024 – Present

Designed and deployed NLP models for enterprise clients

Worked with large-scale text data pipelines

Collaborated with data engineers on production deployment

Conducted statistical analysis and model evaluation

Machine Learning Intern

TechVision AI

2023

Assisted in training and evaluating ML models
Performed data preprocessing and feature engineering
Contributed to NLP-related tasks and experiments

Certifications

Deep Learning Specialization (Coursera)
Natural Language Processing Specialization (Coursera)
AWS Machine Learning Specialty (in progress)

Publications

"Improving Transformer Efficiency for Text Classification" (Workshop Paper, 2024)

Additional Information

Strong foundation in statistics and probability
Experience working in agile teams
Passionate about research and continuous learning in AI/NLP
